

September 2025 Quarterly Activities Report

Manuka Resources Limited (“**Manuka**” or the “**Company**”) is pleased to provide the following report on its activities during the quarter ending 30 September 2025.

Highlights

- **The Company’s senior secured loan was assigned to a Unit Trust comprising existing and substantial shareholders together with an extension of the repayment date to late March 2026¹. The commercial terms and security structure of the senior loan remain unchanged.**
- **The Company completed an Entitlement Offer raising A\$8.3m, fully underwritten by two existing shareholders. The issue price was 4.3 cents per share**
- **Manuka’s New Zealand subsidiary Trans-Tasman Resources - The Fast-track Approvals expert panel commenced assessing TTR’s Taranaki VTM Project application on 25 August 2025. TTR presented the Project to the panel on 2 September and reviewed and summarised the submissions by invited parties to the panel on 7 October 2025. The panel then convened a conference in Hawera on 21 to 23 October to hear from a range of commenters and now has to 18 March 2026 to deliver its decision on granting the environmental consents.**
- **The Project is one of national significance for New Zealand** and supports the Government’s objective to double mineral export earnings from NZ\$1.5B to NZ\$3B per annum by 2035. The Taranaki VTM Project is forecast to generate NZ\$854M export revenue per annum representing over 50% of the targeted increase and making it one of the country’s top 12 exporters.
- **The Company received approval to list on the New Zealand Stock Exchange (NZX) and commenced trading on NZX on 29 September 2025.** Prior to this listing Manuka’s shareholder base comprised circa 30% of New Zealand domiciled investors. Since NZ trading commenced our share register reflects a marked increase in new NZ based investors.
- The Company’s on-site activities at Wonawinta and Mt Boppy continue to be focussed on the restart of production scheduled for late March/early April 2026.

Post Quarter End

Manuka Resources

The Company announced an A\$15.0 million placement² to progress the restart of its Wonawinta Silver Mine and undertake exploration drilling at Mt Boppy. The placement was conducted by the two tranche issuance of 200 million new shares at a price of A\$0.075 per share. The first tranche of approximately 34.4 million shares settled as per the timetable and the second tranche

¹ ASX announcement 26 September 2025

² ASX announcement 21 October 2025

of approximately 165.6 million shares is subject to shareholder vote in a resolution at the annual general meeting on 27 November 2025.

The Company announced the restructuring of the Tennant Metals debt facility which at time of release was of the amount of \$18.2m. The proposed restructure was as follows:

- \$6.4m converting into equity at 7.5cents per share
- US\$3.0m converting into a subordinated debt facility with a 2-year tenor and an interest rate of 14% pa
- US\$4.0m converting into a subordinated working capital facility able to be redrawn by mutual agreement on the same terms as above
- Any residual balance owing to Tennant Metals to be cancelled

Taranaki VTM Project

The Management of Trans-Tasman Resources Limited (the wholly owned subsidiary of Manuka Resources and the 100% owner of the Taranaki VTM Project) have been wholly focussed on the Fast-track Approvals panel assessment of the final environmental approvals. As outlined above, the Panel's decision will be handed down by 18 March 2026.

Dennis Karp, Manuka's Executive Chairman, commented:

Q3 - The Silver Quarter!!

While both gold and silver enjoyed very strong price increases during the September quarter, it was silver which was the real out-performer. As at 30 September 2025, silver had registered a 30% gain for the quarter (while gold's performance of a 15% increase over the same period was excellent in its own right). Both metals have shown spectacular gains over the past 12 months, gold over 50% higher and silver over 60%. As a soon-to-be (March / April 2026) gold and silver producer, with a 1MTA plant and mining permits intact, Manuka really is extremely well placed.

The recent capital raisings together with the debt restructuring, completed on 30 October, continue to highlight a return of shareholder confidence. The raisings also go a long way towards restarting precious metal production. The next decision for Manuka management is to select the best solution for the Company to complete our restart. This decision will be made and announced over the next month, with completion targeted before end of year.

I will close this Quarterly by repeating a sentence from our previous June Quarterly, as in my opinion it is even more the case today:

"I believe firmly that we have three of the most interesting assets, held by any junior resources company, irrespective of alternative geographical location or commodity, and that the political stability and commodity mix of these assets held by Manuka, will contribute materially to the value of the Company."

Exploration Activities

The Company continued low level surface exploration activities during the quarter. The previously mentioned prospectivity analysis of the Wonawinta Project, has been deferred due to staff reductions. This work is anticipated to be re-initiated during Q4 2025 and Q1 2026 and will generate a number of prioritised drill targets that would potentially augment the mineral resource base at Wonawinta, and increase the current 10-year LOM estimate.

A similar exercise is also being planned for the Mt. Boppy gold mine, where planned output will include a 3D structural interpretation integrated with a revised 3D IP model.

Cashflow and Hedging

The Company did not have any open hedge contracts as at 30 September 2025.

Total borrowings as at 30 September 2025 were A\$39.09 million. Unused facilities available at Quarter end were A\$2.03 million and the cash balance was A\$0.368 million.

In accordance with ASX Listing Rule 5.3.5, during the quarter, the Company made cash payments of \$0.350 million to related parties and their associates (refer items 6.1 and 6.2 of the Appendix 5B). This was the aggregate amount paid to the directors including salary, directors' fees, consulting fees and superannuation.

Mining Development Activities

In accordance with ASX Listing Rule 5.3.1 cash outflows for the quarter in relation to exploration development activities were \$0.186 million (refer items 1.2(a) and 2.1(d) of the Appendix 5B). The cost related to salaries and wages for geology, as well as licencing fees, metallurgical test work and assays.

Mining Production Activities

In accordance with ASX Listing Rule 5.3.2 cash outflows for the quarter in relation to mining production and development activities were \$0.649 million (refer Item 1.2(b) and 1.2(c) of the Appendix 5B) and comprised the following:

- Development \$0.095 million
- Crushing contractors \$0.169 million
- Processing \$0.385 million

Mining Tenements

In accordance with ASX Listing Rule 5.3.3, the following information is provided for the quarter ended 30 June 2025.
