3 FOR 5 PRO-RATA RIGHTS OFFER OF NEW SHARES

Dear Shareholder,

Over the last 12 months the new Board of New Talisman has been fully focussed on delivering results for our loyal shareholders. Our goals over the last year have been to:

- stabilise the company – achieved
- reduce overheads and improve efficiencies – achieved
- Talisman mine – producing gold in 2023 – on track.

In order to produce gold at Talisman we estimated that we will need approximately NZ\$3.45 million dollars of capital to fund the development of Talisman and get to gold production. We have raised one million dollars of the funds needed by way of Convertible Note in April 2022. We now seek your support to raise additional funds to seek to bring Talisman into production and finally realise the potential value of this company for shareholders.

We recognise that NTL has made numerous calls for capital over many years. However, your new Board has a very specific and realistic plan to develop Talisman with the goal to be generating profit and returns for shareholders by the end of 2023. If we cannot complete this capital raise, the Board's view is that there are very few options left for the company.

The Board has reviewed the Capital Raising methods open to it and determined that a Rights Issue, with an oversubscription facility, will be the fairest to all shareholders.

Those Directors with shareholdings intend to participate in the rights issue. NTL has also received indications from its two largest shareholders that they intend to participate in the issue. However, no assurances can be given on the total amount that will be raised from the issue or from any particular shareholder.

Full details of the offer are described below, with more information in the Frequently Asked Questions on pages 10-11 of this document.

The development plan for Talisman is focused on:

- Recommencing underground activities at Talisman mine
- Advancing the Mystery Vein drive which has random chip sampled at promising levels of a weighted average 39.35g/t Au and 34.75g/t Ag, as previously announced on 8 May 2018 which can be found on the following link: <https://www.asx.com.au/asxpdf/20180508/pdf/43tvlpmv420f4f.pdf>
- Opening a second face on the Mystery vein, increasing production volumes, which will also provide the required Second egress (exit).
- Production of gold/silver concentrate to produce bullion.

On behalf of New Talisman Gold Mines Limited, I present to you a 3 for 5 pro-rata rights issue, for your consideration.

The Company is offering New Shares at an Issue Price of NZ\$0.018 or AU\$0.017 per New Share, on the basis of 3 New Shares for every 5 Existing Shares held as at the Record Date (20 February 2023).

All Eligible Shareholders are entitled to participate in this Offer. If you accept your Entitlement in full, you can also apply for Additional New Shares (i.e. Shares in excess of your pro rata Entitlement) through the Oversubscription Facility. If you do not wish to take up your Entitlement under the Offer, you will not be entitled to sell your Rights on market.

The structure and pricing of this Offer allows all Eligible Shareholders an opportunity to participate directly in the development of the Talisman mine and to finally be part of the future success and profitability of NTL. The FAQs on pages 10-11 will hopefully address questions you might have about why you should consider this investment.

Please note that applications to participate in the Offer can only be made online at www.shareoffer.co.nz/ntl. Only shareholders on the register at the Record Date with an address in New Zealand or Australia can participate in the Offer.

If you are keen to know more about NTL and the offer, please contact NTL's Company Secretary Ms Jane Bell jane@newtalisman.co.nz

I will participate in the Offer and encourage you to join me in finally realising the potential of the Company.

Yours sincerely,

BUSINESS UPDATE

The Board is focused on running a lean and cost-efficient business.

We have:

- Brought external support services in house by expanding the existing Company Secretary role to incorporate the CFO role and responsibilities – enabling us to provide our financial reporting in-house and leveraging existing resources.
- Actively sought an early release from the lease of the company office in Parnell – and negotiations with a potential new tenant continues.
- Redeployed Board Member John Upperton as our Strategy Delivery Manager.
- We continue to review all contractual arrangements and will renegotiate or terminate those which are not adding value.

Talisman Mine

The new Board undertook a thorough review of the Company's core asset, the historic Talisman Mine, and as a result, devised a new Strategic Plan to advance the Mystery vein on dual faces, while at the same time creating the required second egress. Chip sampling of Mystery has averaged above 32g of gold per tonne. The vein appears to run in north/south direction, approximately parallel to the rich Maria lode which historically has yielded 3.5 million bullion ounces.

Advancing the face of Mystery vein northwards enables four aims of the Company.

- Generating cash by production of a high-grade gold and silver concentrate ready for the production of bullion
- Gaining knowledge of the vein system in an unexplored area
- Complying with second egress requirements.
- Opportunity to add to the Mineral Resource

Extensive discussions with mining industry experts has validated the decision to use innovative mining techniques to minimise the volumes leaving the mine. We remain open to exploring all feasible methods for producing bullion.

The flow on effects of this brings multiple benefits

- Reduces the environmental footprint of production
- Greatly reduces the above surface activity in the mine vicinity
- Solves the longstanding problem of access to processing facilities
- Reduces production costs.

Talisman Mine - Overview

The Company holds a 25 year mining permit granted in 2009 covering 299 hectares, including the former Talisman and Crown-Welcome mines. The permit lies between the towns of Waihi and Paeroa in the Hauraki Goldfield and includes mines with total historical production (from the 1880s to 1992) of 1 million ounces gold and 3 million ounces silver.

The Talisman permit and the Karangahake Gold Project are located in the southern part of the Coromandel Volcanic Zone (CVZ), a north- northwest trending zone of Miocene to early Quaternary sub-aerial calc-alkaline volcanics. The permit area covers part of the Karangahake gold-silver deposit, one of the major deposits of the Hauraki Goldfield, a 200 km long metallogenic zone of epithermal gold-silver and porphyry copper-gold mineralization that extends from Great Barrier Island in the north to as far south as Te Aroha and Te Puke.

The main mineralised structures within the project are the Maria Vein, Mystery Vein and Welcome/Crown Vein. The footwall extension of the Welcome Vein is located approximately 100m to the east and is called the Crown Vein.

Historically the Karangahake deposit was divided into separate mines focused on different gold bearing veins or lodes: the Crown mine, and the Talisman Mine. The lodes are sub-parallel, trending north-northeast. Mining has followed the Welcome/Crown and Maria veins along strike with the Welcome/Crown veins defining the eastern extent of the mine and the Maria vein defining the western extent of the mine. The Mystery Vein (approx. 1m width) is located in between these two vein systems and was discovered in the late 1980's during the formation of the Keillor's cross-cut, which connects the Maria vein to the Welcome/Crown vein. Historically, mining has focused along 4 sub-vertical ore shoots along the Maria Vein (Woodstock, Talisman, Bonanza, and Dubbo).

The Mystery vein has never been mined and is one of the potential resource blocks on which we intend to focus for mining.

TALISMAN MINE CURRENT RESOURCES

The table below excludes the Mineral Resource Estimate for the Crown/Welcome vein system, that were not reassessed during 2019 and were not included in the review by AMC but remain part of the total Talisman Mineral Resource. Resources attributable to the Crown/Welcome system were estimated previously at 31,000 equivalent bullion ounces. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

The more detailed information, including JORC Table 1, was released to the market on 24/06/2020. Please see the full report found [here](#).

Note: Data sources include historic bullion samples, drill holes and underground channel samples

- Mineral Resources are reported on a 100% basis to a nominal 2.2 Bullion equivalent grams per tonne cut-off grade which was determined in 2017 based on estimates of mining costs, metallurgical recoveries, treatment and refining costs, general and administration costs, royalties, and commodity prices.
- Ounces are estimates of metal contained in the Mineral Resource and do not include allowances for processing losses.
- For reporting purposes, all resources are reported as equivalent bullion values, due to bullion values rather than gold and silver grades being the only grade information that is available for historic channel samples. Conversion of more recent gold and silver values to equivalent bullion values uses the formula: $\text{Equivalent bullion grade} = \text{Gold grade} + (\text{Silver grade} * 0.031609)$, which is based on historical prices of gold and silver. The equivalent bullion value of the resource is the same as an estimated gold equivalent grade due to the manner in which the historic and modern bullion values have been determined. Bullion conversions by NTL were based on a constant gold price of at £4-6s-0d/oz or USD20.47/oz during the period of historical production. Silver prices ranged from USD 0.49 to USD 1.03/oz.
- Tonnage and grade measurements are in metric units. Gold ounces are reported as troy ounces. Rounding as required by reporting guidelines may result in apparent summation differences between tonnes, grade and contained metal content.

FREQUENTLY ASKED QUESTIONS

NTL Capital Raise to Support Talisman Development (Mystery Vein)

1. Are there any regulatory hurdles before the mine can be re-entered?

Re-entry requires renewed health and safety plans. We have engaged Terra Firma <https://www.terrafirma.kiwi.nz/> to refresh the Health and Safety documentation in preparation for re-entering the mine, that documentation is anticipated to be completed by the end of February 2023 and will then potentially liaise with Worksafe prior to recommencing operations.

2. How soon are you able to start mining?

Terra Firma are already busy preparing the health and safety management plan for the mine. There will also be additional planning and external inspections that need to occur before everyone is confident that it is safe to allow a crew underground, eg checking underground conditions, any hazards etc. This process, including a Worksafe review period if required, we expect to take around three months. So, we expect to be underground and mining before the end of the second quarter of 2023, with ore being produced shortly thereafter.

3. What's the current condition of the mine?

Our contracted security firm checks the condition of the facilities regularly and carries out weeding/vermin management etc. We have recently carried out a visual inspection of the road, exterior and access areas of the mine and all look to be in good condition. That visual inspection has confirmed that recent rain events and earthquakes have not impacted the compound or portal and given the mine history of over 130 years and its resilience during that time, we do not anticipate the recent earthquakes to be an issue.

4. The processing route for the ore has been a long time problem. How have you solved this?

We have considered a number of options for processing of ore. The preferred option at this stage is to produce a concentrate underground using innovative mining techniques. This would require purchase of some specialist machinery which is part of the expenditure planned from this capital raise.

5. How much ore are you expecting to extract on a daily/weekly/annual basis and what will this cost to extract and produce?

We have resource consent for bulk sampling that allows for a maximum 20,000 m3 (approx. 50,000 tonnes) per annum. Initially we are looking to extract 7,000 tonnes per annum or 140 tonnes per week. Volumes will be constrained initially as we are only bulk sampling the Mystery Vein area but this can be increased over time as we identify new targets within the mine and improve our cashflow.

We estimate that our costs will be \$80,000 per week or about \$4,000,000 per annum (inclusive of corporate overheads) depending on the amount extracted and other variables.

6. Under this cost structure what grades and volumes are required to result in positive cashflow?

The JORC (<https://www.jorc.org/>) report outlines both inferred and indicated resource for the project. JORC is the industry standard for gold mining and is required to be prepared/audited by a suitably qualified independent person (the Competent Person). In addition random chip sampled had promising levels of a weighted average 39.35g/t AU as can be found on the link <https://www.asx.com.au/asxpdf/20180508/pdf/43tvlpmv420f4f.pdf>

The gold price in January 2023 has traded between NZ\$2,900 to NZ\$3,000 per troy ounce (a troy ounce is approximately 31.1 grammes).

The below table lays out the different cashflow scenarios dependent on grade and volume (assuming a gold price of NZ\$3,000 per troy ounce):

Tonnes	Grade g/t- AU	Cash Inflow	Cash Outflow*	Net Cashflow
5000	6	\$2,895,398	\$3,700,000	-\$804,602
7000	6	\$4,053,557	\$4,000,000	\$53,557
9000	6	\$5,211,716	\$4,500,000	\$711,716

Tonnes	Grade g/t- AU	Cash Inflow	Cash Outflow*	Net Cashflow
5000	8	\$3,860,531	\$3,700,000	\$160,531
7000	8	\$5,404,743	\$4,000,000	\$1,404,743
9000	8	\$6,948,955	\$4,500,000	\$2,448,955

Tonnes	Grade g/t- AU	Cash Inflow	Cash Outflow*	Net Cashflow
5000	10	\$4,825,663	\$3,700,000	\$1,125,663
7000	10	\$6,755,928	\$4,000,000	\$2,755,928
9000	10	\$8,686,194	\$4,500,000	\$4,186,194

Tonnes	Grade g/t- AU	Cash Inflow	Cash Outflow*	Net Cashflow
5000	12	\$5,790,796	\$3,700,000	\$2,090,796
7000	12	\$8,107,114	\$4,000,000	\$4,107,114
9000	12	\$10,423,432	\$4,500,000	\$5,923,432

*Cash Outflows include corporate overhead

7. You indicated that chip sampling showed promising levels of 39.35 grams per tonne of ore. Why are you indicating a range between 6g/t and 12g/t in your tables?

The grade is diluted by the surrounding rock that is removed at the same time as the gold bearing material. In addition to this, levels of recovery can have an impact on the overall grades.

We believe our planning to be conservative and is the most prudent way forward as we expect substantial variation in the material as the vein is explored further.

8. The JORC table also indicates significant quantities of silver why is that not in the cashflow projections?

Due to the conservative nature of our projections we have taken production of silver to be an upside that remains available as contingency to offset any unexpected costs.

9. What happens if you do not raise sufficient funds to get the mine to production?

In reality there will be limited options. The most likely is that the company sells its assets- (hopefully for a reasonable price), winds up, and returns the surplus funds to shareholders.

- (h) you acknowledge that New Talisman may disclose any information in or relating to your application and Application Monies to Computershare Investor Services Limited and Computershare Investor Services Pty Limited in connection with their management of the Offer;
- (i) you acknowledge that New Talisman is not liable for any exercise of its discretions referred to in these Terms and Conditions; and
- (j) you irrevocably and unconditionally agree to these Terms and Conditions and agree not to do any act or thing which would be contrary to the spirit, intention or purpose of the Offer.

4. Issue Price

4.1 The Issue Price is NZ\$0.018 or AU\$0.017 per New Share. You agree to pay the Issue Price per New Share up to a maximum of the Entitlement you have selected on your application. Applicants may choose whether to pay the New Zealand dollar Issue Price or the Australian dollar Issue Price.

4.2 If an Eligible Shareholder fails to accept any New Shares and pay the associated Application Monies by the Closing Date, their Rights will lapse.

4.3 As required by the Listing Rules, if New Talisman receives, before the Closing Date, a renunciation and an acceptance in respect of the same Right(s), the renunciation shall be given priority to the acceptance.

4.4 Application Monies received will be held in a trust account with the Registry until the corresponding New Shares are allotted or the Application Monies are refunded. Interest earned on the Application Monies will be for the benefit, and remain the property, of New Talisman and will be retained by New Talisman whether or not the issue of New Shares takes place. Any refunds of Application Monies will be made within 5 Business Days of the issue of New Shares (or such earlier date that the decision not to proceed with the Offer is made).

5. The New Shares

5.1 New Shares issued under the Offer will rank equally with, and have the same voting rights, dividend rights and other entitlements as, existing fully paid Shares quoted on the ASX and the NZX Main Board.

5.2 The New Shares to be issued under the Offer have been accepted for quotation on the NZX Main Board, and New Talisman will apply for the Shares to be quoted on the ASX, with effect on or shortly after the Allotment Date. You cannot trade in any Shares issued to you pursuant to the Offer, either as principal or agent, until official quotation on the ASX and the NZX Main Board in accordance with the Listing Rules. New Talisman expects the Shares will commence trading on the ASX and the NZX Main Board on the Trading Day after New Shares are allotted. The NZX Main Board is a licensed market operated by NZX Limited, which is a licensed market operator regulated under the Financial Markets Conduct Act 2013. Neither NZX nor ASX accepts any responsibility for any statement in this booklet or the online application portal.

6. No Underwriting of the Offer

The Offer is not subject to any underwriting arrangement.

7. Amendments to the Offer and waiver of compliance

- 7.1 New Talisman will not change these Terms and Conditions (subject to its discretion to revise the timetable). However, New Talisman reserves the right to waive compliance with any provision of these Terms and Conditions. If New Talisman waives compliance with any provision of these Terms and Conditions, that waiver may, if so expressed, apply to all Eligible Shareholders.
- 7.2 New Talisman reserves the right to, in its absolute discretion, modify, suspend, withdraw, terminate or correct the Offer, at any time. New Talisman will notify the NZX and ASX if it does so modify, suspend, withdraw, terminate or correct the Offer.
- 7.3 New Talisman may issue fewer Shares than an Eligible Shareholder applies for under this offer (or none at all) if New Talisman believes that issuing those Shares would break any law or any of the Listing Rules.

8. Oversubscription Facility

- 8.1 Eligible Shareholders who accept their full Entitlement may also apply for Additional New Shares (in excess of their Entitlement) at the Issue Price pursuant to the Oversubscription Facility.
- 8.2 Applicants may apply for any number of Additional New Shares, but there is no guarantee that Applicants will be allocated any or all of the Additional New Shares for which they apply. The number of New Shares available under the Oversubscription Facility will equal the number of New Shares for which valid applications are not received by the Closing Date.
- 8.3 The number of New Shares in the Oversubscription Facility will be allocated, subject to there being a sufficient number of New Shares in the Oversubscription Facility, by reference to existing holdings, the number of pro-rata to the number of Additional New Shares applied for (as a proportion of all such remaining unsatisfied applications), and such other matters as the board of the Company considers appropriate (subject to applicable laws and the Listing Rules). The Company's decision on any scaling will be final.

9. Partial acceptance

- 9.1 If you are an Eligible Shareholder, you are not required to subscribe for all of the New Shares to which you would be entitled under the Offer. You may subscribe for a proportion of your New Shares or allow your Entitlement to lapse.

10. Rights not quoted

- 10.1 The Rights will not be quoted on the NZX Main Board or by ASX and accordingly there will not be an established market for Rights. For the purposes of the NZX Listing Rules the offer is treated as renounceable since Rights can be sold or transferred off-market. If you wish to sell or transfer your rights privately to a buyer you identify, you should contact the Registry to request an off-market Security Renunciation Form.

11. Interpretation of Documents

In the event of any conflict between these Terms and Conditions (including the Glossary) and the accompanying letter from the Chairman and the online application portal, these Terms and Conditions will take precedence.

12. Governing Law

These Terms and Conditions are governed by, and are to be construed in accordance with, the laws of New Zealand.

13. Dispute Resolution

If any dispute arises in connection with the Offer, New Talisman may settle it in any manner it thinks fit. It may do so generally or in relation to any particular participant, or application for Shares. New Talisman's decision will be final and binding.

14. Inconsistency

Unless otherwise determined by the directors of New Talisman, in the event of any inconsistency between the terms and conditions of the Offer and New Talisman's constitution, New Talisman's constitution shall prevail.
