Fisher & Paykel Healthcare launches Evora Full – a compact full-face mask for sleep apnea

Auckland, New Zealand, 6 October 2021 – Fisher & Paykel Healthcare Corporation Limited today announced the launch of F&P Evora™ Full – its latest compact full-face mask for the treatment of obstructive sleep apnea (OSA).

“Evora Full is a minimal-contact mask designed to allow patients to move and sleep freely without compromising performance,” said Andrew Somervell, VP Products and Technology for Fisher & Paykel Healthcare. “It offers patients full performance in a compact size.”

The mask has a floating seal and stability wings that work together to create the next generation of Dynamic Support Technology™. The compact seal floats under the nose to provide patients with a clear line of sight, while stability wings keep the seal stable.

The Evora Full mask is supported by positive clinical trial results:

- 91% of trial participants rating Evora Full as ‘stable’ or ‘very stable’¹;
- 93% found the mask to be ‘comfortable’ or ‘very comfortable’²; and
- 96% were able to sleep in their preferred sleeping position³.

F&P Evora Full will initially be available in Australia and New Zealand and will be launched in other countries upon receiving clearances.

The mask comes with three seal sizes (Extra Small, Small to Medium, and Large) and two headgear sizes (Standard and Extra Large).

For more information, visit www.fphcare.com/evorafull.
