

Brownfields Exploration in New Zealand's Hauraki Goldfield

- **Waitekauri located in major Hauraki gold system near Waihi**
- **Drilling commenced at Waitekauri on 11 October 2025**
- **Historic underground trench results incl. 13m @ 80 g/t Au**

DISCLAIMER

Nature of Document

The purpose of this presentation is to provide general information about Uvre Limited (ABN 85 650 124 324) (**Uvre**) which is current as at the date released unless otherwise specified. It is information in a summary form and does not purport to be complete. The information in this presentation should be read in conjunction with Uvre's other announcements lodged with the ASX.

No Advice or Offer

This presentation is presented for informational purposes only. It does not constitute an offer, invitation, solicitation or recommendation or advice with respect to the issue, purchase, or sale of any securities or other financial products in Uvre. It is not intended to be, and is not, a prospectus, product disclosure statement, offering memorandum or private placement memorandum for the purpose of Chapter 6D of the Corporations Act 2001. It is not recommended that any person makes any investment decision in relation to Uvre based solely on this presentation. This presentation does not necessarily contain all information which may be material to the making of such a decision. Any investor should make its own

independent assessment and determination as to Uvre's prospects prior to making any investment decision and should not rely on the information in this presentation for that purpose. This presentation does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or to any "US person" (as defined in Regulation S under the US Securities Act of 1933, as amended (Securities Act)) (US Person). Securities may not be offered or sold in the United States or to US Persons absent registration or an exemption from registration. Uvre's shares have not been, and will not be, registered under the Securities Act or the securities laws of any state or jurisdiction of the United States. This presentation is not for distribution directly or indirectly in or into the United States or to US Persons.

Except for statutory liability which cannot be excluded, Uvre as well as its officers, employees and advisers expressly disclaim any responsibility for adequacy, accuracy, reasonableness or completeness of the material contained in this presentation and exclude all liability whatsoever (including in negligence) for any loss or damage which may be suffered by

any person as a consequence of any information in this presentation or any error or omission therefrom. Uvre accepts no responsibility to update any person regarding any inaccuracy, omission or change in information in this presentation or any other information made available to a person nor any obligation to furnish any person with any further information.

Disclaimer/Forward Looking Information

This presentation contains certain forward-looking statements, guidance, forecasts, estimates, prospects and projections in relation to future matters that may involve risks or uncertainties and may involve significant items of subjective judgement and assumptions of future events, which as at the date of this presentation are considered reasonable, but that may or may not eventuate (Forward Looking Statements). Forward Looking Statements can generally be identified by the use of forward-looking words such as, 'anticipate', 'estimates' 'will', 'should', 'could', 'may', 'expects', 'plans', 'forecast', 'target' or similar expressions and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production and expected costs. Indications of, and guidance on future earnings, cash flows, costs, financial position and performance are also Forward-Looking Statements.

Persons reading this presentation are cautioned that such statements are only predictions, and that actual future results or performance may be materially different. Forward Looking Statements, opinions and estimates included in this presentation are based on assumptions and contingencies which are subject to change, without notice, as are statements about market and industry trends, which are based on interpretation of current market conditions. Forward Looking Statements are provided as a general guide only and should not be relied on as a guarantee of future performance.

Forward Looking Statements are subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward looking information. No representation or warranty, express or implied, is made by Uvre that any Forward-Looking Statement will be achieved or proved to be correct. Further, Uvre disclaims any intent or obligations to update or revise any Forward-Looking Statements whether as a result of new

information, estimates or options, future events or results or otherwise, unless required to do so by law.

This presentation contains information relating to exploration results and mineral resources reported by third parties in respect of projects located in proximity to the Company's tenements. Such information is provided for illustrative purposes only and should not be interpreted as an indication that similar results will be achieved on the Company's tenements. The Company has no interest in the neighbouring projects referred to and has not independently verified the accuracy, reliability or completeness of the third-party information. Mineralisation on projects in proximity to the Company's tenements is not necessarily indicative of mineralisation within the Company's own holdings.

JORC 2012 Competent Persons Statement

The information in this Report that relates to Exploration Results is based on information compiled by Mr Peter Zitnan, who is a Member of the Australian Institute of Geoscientists. Mr Zitnan, who is Director of Otagold Limited, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Zitnan consents to the inclusion in this Report of the matters based on the information in the form and context in which it appears.

The information in this presentation that relates to Exploration Results is extracted from the ASX announcements dated:

1 September 2025 ("Waitekauri drilling set to commence")
27 June 2025 ("High Grade Rock Chips at flagship Waitekauri Gold Project")
19 May 2025 ("Transformational NZ Gold Projects Acquisition")

which are available at www.uvre.com.au. Uvre confirms that it is not aware of any new information or data that materially affects the information included in the original announcements and that all material assumptions and technical parameters underpinning the Exploration Results in the original announcements continue to apply and have not materially changed. Uvre confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original announcements.

NEW ZEALAND: THE LAND OF THE LONG GOLD OPPORTUNITY

- Historically, New Zealand's strict regulatory environment has curbed exploration budgets and activity for decades
- As a result, much of the vast highly-prospective tenure has never been exposed to modern exploration
- Recently, NZ has a more pro-development Government and significantly faster approval process to attract investment
- Our gold projects are in Tier-1 locations and home to well established multi-million-ounce mineralised systems which underpin major producers e.g. OceanaGold (~\$4b market cap)¹
- This favourable environment and recent exploration successes are driving interest

EXPERIENCED BOARD AND MANAGEMENT

BOARD OF DIRECTORS

Brett Mitchell Executive Chairman

Mr Mitchell is an experienced corporate finance executive with over 25 years of experience in venture capital and equity capital markets, leading transactions in the mining, energy, technology and life sciences sectors.

Norman Seckold Non-Executive Director

Mr Seckold is an experienced mining executive who has spent more than 40 years in the full-time management of natural resource companies, both in Australia and overseas. Mr Seckold is currently Executive Chair of Nickel Industries (ASX:NIC), Alpha HPA (ASX:A4N).

Peter Nightingale Non-Executive Director

As a director or company secretary Mr Nightingale has, for more than 35 years, been responsible for the financial control, administration, secretarial and in-house legal functions of a number of private and public listed companies in Australia and the USA including Bolnisi Gold N.L. and Nickel Industries (ASX: NIC).

Alex Passmore Non-Executive Director

Mr Passmore is a qualified geologist and experienced corporate executive having led many project acquisitions, divestments and fund raisings in the junior and mid cap resources sector over the past 20 years. He is currently Managing Director of New Murchison Gold (ASX: NMG).

MANAGEMENT / OTAGOLD FOUNDERS

Peter Zitnan NZ Based CEO / Chief Geologist

Peter is a geologist with 20 years' experience spanning porphyry and epithermal gold, rare earths and copper-gold.

Jason Beckton Otagold Director

Jason has been working as a geologist for 30 years. He has extensive experience in the Australian gold industry, including in management roles. He is currently Managing Director of Prospech Ltd (ASX: PRS) and Non-Executive for Lode Resources (ASX:LDR) and Cipango Japan (unlisted).

Waitekauri – Tier 1 Brownfields Gold Project:

World Class Hauraki Goldfield

WAITEKAURI GOLD PROJECT – COMPELLING BROWNFIELDS OPPORTUNITY

- Uvre owns 100% of several highly prospective NZ gold exploration projects in North (epithermal) and South (orogenic) Island gold belts
- **Flagship asset is Waitekauri Gold Project** - tenement 1km west of OceanaGold's +12Moz Waihi gold mine on the North Island, and only 4.5km south from OceanaGold's Wharekirauponga (WKP) deposit
- **Waitekauri is within the Hauraki Goldfield, sits in a NE/SW heavily mineralised Au belt hosting three other +1Moz Au deposits**
- Extensive epithermal gold mineralisation and numerous drilling targets already identified at Waitekauri
- Waitekauri historical production ~29koz at 48g/t Au+Ag (bullion)
- **South Island orogenic gold projects - Invincible (Application), Oturehua and Roaring Meg**– Oturehua is only 20km from Santana's 2.2Moz Bendigo-Ophir and 50km from OceanaGold's Macraes
- Highly successful mining executive Norm Seckold is the largest shareholder (vendor/placement) and Non-Executive Director

WAITEKAURI GOLD PROJECT OVERVIEW

Multi-million-ounce opportunity in world-class goldfield

Overview

- Waitekauri comprises 58km² of highly prospective ground in the rich Hauraki Goldfield – over 160 years of gold production, 50 epithermal mines
- Historical production from Hauraki Goldfields of +15Moz Au and 60Moz Ag³
- Located adjacent to four +1Moz Au-Ag deposits (**Waihi, WKP, Golden Cross, Karangahake**) and on the NE/SW mineralised trend of three +1Moz Au-Ag deposits – WKP, Golden Cross, Karangahake
- Access to well established mining infrastructure and skilled workforce
- Located immediately along strike from Golden Cross and 2Moz WKP deposit where latest drilling extended known mineralisation to within 4.5km of the Waitekauri boundary ^{1,2}
- Waitekauri has three high priority prospects – **Jubilee, Scotia, Sovereign**
- Historical production from Jubilee – 29koz Au+Ag bullion @ 48g/t Au+Ag.⁴

WAITEKAURI GOLD PROJECT OVERVIEW

High grade along strike from WKP 2.2Moz Au discovery

- Waitekauri Gold Project priority prospects on private farmland and active forestry operations- permitting and approval processes for drilling fast-tracked
- Recent discovery by OceanaGold in 2017- WKP deposit along NE/SW structural trend – **2.2Moz Au @ 14.3g/t Au & 3.1 Moz Ag**¹
- **WKP recent exploration results**, step out holes on structure to SE towards Waitekauri include:
 - **4m @ 43.8g/t Au, 8m @ 11.8 g/t Au, 6m @ 14.7 g/t Au**
- At Jubilee only 10 holes have been drilled along the strike and only 3 holes to > 250m vertical depth - cannot be viewed as drill tested

Strong start by Uvire

- Assays up to 18g/t Au from first rock chips - included abundant visible gold, and epithermal quartz identified in a new area with no historical drilling
- Block modelling from historical data including UG channel samples from Jubilee include 24.0m @ 45g/t Au, 13m @ 80g/t Au, 23.0m @ 42g/t Au²

¹ <https://oceanagold.com/operation/resources-and-reserves/>

² Uvire ASX release dated 1 September 2025

WAITEKAURI – HIGH GRADE UNDERGROUND TRENCHING

- Historical underground trenching at Jubilee by Cyprus Gold NZ in 1991 delivered significant high grade assay results including¹:
 - **Channel_JU28 13.0m @ 80g/t Au**
 - **Channel_JU27 24.0m @ 45g/t Au**
 - **Channel_JU22 23.0m @ 42g/t Au (shown in image to the right)**
- Historical production at Waitekauri graded 48g/t Au+Ag (bullion)
- Drilling targeting will be based on the historical mining, historical Cyprus trenching results and recent strong rock chip assays **including 18.4g/t Au**

¹ Uvire ASX release dated 1 September 2025

DRILLING HAS STARTED AT SCOTIA SOUTH, JUBILEE TO FOLLOW

Exploration Target – Bonanza style Au-Ag low sulphidation veins

Drilling commenced at Scotia South on 11 October 2025, the drill rig will immediately move to drill approx 8 holes at the brownfields Jubilee gold project.

- Access to more than NZ\$5 million exploration work completed historically
- Resampling of the historical drillcore from Jubilee by previous operator Laneway Resources identified new Au rich zone interpreted as a blind ore shoot¹
- ML-18 (170.5-170.8m) 0.3m @ 521g/t Au – approx. 50m, parallel to historically stoped Jubilee vein¹
- 3,250m diamond drilling program designed with landowner access agreements completed
- Significant potential identified at depth and along strike

¹ Laneway Resources Limited Annual Report 30 June 2021, page 14

DRILLING AT WAITEKAURI'S SCOTIA SOUTH AND JUBILEE HAS COMMENCED

Target – bonanza style Au-Ag low sulphidation veins

Hole ID	Easting	Northing	RL	Azi T	Dip	TD	Primary Target
LNY01	1844219	5859497	319	135	-40	300	High grade channel samples in Jubilee vein at ~70m

South Island Orogenic Au Exploration Project Portfolio:

Otago Goldfields

INVINCIBLE GOLD PROJECT – HISTORIC MINE

Overview

- Invincible Gold Project (*Application*), 164 km² permit targeting similar style mineralization as Macraes (OceanaGold) and Bendigo-Ophir (SMI) – **gold/tungsten bearing veins**
- **Historic Invincible Gold Mine** - The gold/tungsten veins produced at an average grade of **30g/t Au in production from the 1880's – 1910's**
- Macraes and Bendigo-Ophir are bulk tonnage with discrete high-grade gold and tungsten zones - both commodities on New Zealand's critical minerals list
- **No modern exploration** of combining the footwall tungsten mineralisation with hanging wall gold zones (like Macraes and Bendigo-Ophir)
- Located on private farmland – standard approvals process for exploration drilling, not Department of Conservation (DOC) land

Historic Invincible Mine – separation circuit

OTUREHUA GOLD PROJECT – GOLDEN PROGRESS MINE

Overview

- 32.4km² exploration permit, located on privately owned farmland
- **Golden Progress Mine:**
 - Historical production estimated at 15-20koz @ 48.8g/t Au
 - 20km South-East from Santana Minerals (ASX-SMI) 2.2Moz @ 2.3g/t Au Bendigo-Ophir deposit
 - 50km North-West from Oceana Gold's Macraes >10Moz gold producer
- Gold in quartz-arsenopyrite-pyrite veins initially discovered in 1868, and mined until 1936
- First rock chips taken by Uvre included 9.3g/t Au

Headframe at Oturehua's Golden Progress Mine

ROARING MEG GOLD EXPLORATION PROJECT

Overview

- 66.4km² prospecting permit, gold exploration focus on privately owned farmland
- Wide zones of mineralisation and alteration hosted in graphitic schist – never drill tested
- Geochemical soil sampling outlined anomalous Au
- Rock chips from quartz veins up to 9.6g/t Au
- The host rocks are quartz-feldspathic schists, a number of gold bearing zones are present
- Mineralised zones are generally aligned in a north-south orientation and may all be related to a major structural feature

LOTTIN POINT GOLD EXPLORATION PROJECT

Overview

- 11km² exploration permit, early stage exploration
- Strategy targeting high grade VMS System – similar to Golden Grove – Roseberry, Henty style mineralisation
- High grade gold and base metal mineralisation in ophiolites (pillow basaltic lavas and gabbro-diorite intrusions)
- Discovered in the 1970s by Anglo American - Extensive data available including geophysics & geochem, with only three holes drilled (300m total)
- Silica-barite boulders in float assayed up to 58g/t Au, 77g/t Ag, 2.4% Cu, 2.6% Pb & 7.3% Zn ¹
- Set of 14 rock chip assays by Delta Gold in 1998 averaged 11 ppm Au, 8.3ppm Ag, 0.4% Cu, 0.1% Pb, 0.9% Zn ²

| INVESTMENT SUMMARY

- Highly compelling exploration projects in a Tier-1 location, NZ fast track approvals process
- **Brownfields Au Exploration Focus – Waitekauri, Oturehua and Invincible, all historic gold mines**
- Well funded for exploration programs: ~\$5.4m cash at bank and nil debt¹
- Led by Norm Seckold, outstanding ASX track record of mineral exploration and mining project development = value creation for shareholders (NIC, A4N, SMI)
- **Waitekauri drilling commenced on 11 October 2025, compelling brownfields exploration project**, with historic gold production located in the prolific Hauraki Goldfield, major Au mineralised system
- Waitekauri has potential to host major Au deposits, as shown by the four +1Moz deposits neighbouring OceanaGold's Waihi and WKP deposits, Golden Cross and Karangahake
- Immediate pipeline of exploration activity and results starting early Q4 2025 and ongoing in 2026 – Waitekauri, Invincible and Oturehua the immediate exploration focus
- **Highly leveraged to exploration success** - Enterprise Value of only ~\$37.2m (@ 22.5c) ¹
