NOTES

About Manawa Energy Limited

Manawa Energy is Aotearoa New Zealand's largest independent electricity generator and renewables developer, with 26 power schemes throughout New Zealand and a total installed capacity of 498MW. We also supply around 650 commercial and industrial customers with ~1,200 gigawatt hours of electricity each year via ~6,700 electricity connections.

Manawa (meaning 'heart') acknowledges our heritage establishing electricity generation on the Omanawa River in the Kaimai area during the early 1900s. Our name was gifted by Ngāti Hangarau hapū, mana whenua of the area where our Kaimai hydro-electric power scheme is located.
